PRESS RELEASE · OPENAI PARTNER NETWORK

Centrum Transgenia, S.A.S. Named an *OpenAI Select Partner.*

Mexico City, Mexico · **September, 1st. 2026.**· Centrum Transgenia SAS, a Mexican technology boutique specializing in AI implementation, ERP-Odoo, and custom software development for small & medium (SME)-sized organizations, today announced that it has been named an OpenAI Select Partner within the OpenAI Partner Network.

The OpenAI Partner Network is a global program for partners to build, sell, and deliver AI solutions with OpenAI. It brings together partners with deep industry expertise, delivery capabilities, and customer relationships while equipping them with resources, enablement, and support to help enterprises adopt OpenAI frontier models and products and turn them into measurable impact.

As an OpenAI Select Partner, Centrum Transgenia SAS will continue working with OpenAI to help organizations build, deploy, and scale AI solutions responsibly and effectively. This work will help organizations get more useful work from every token and stronger performance per dollar with GPT-5.6, while using ChatGPT Work to turn ambitious goals into finished work. Centrum Transgenia SAS focuses its practice on two segments of the Mexican economy (medical practices and clinics, and distribution and trading companies), embedding language models into operational processes that already exist, inside the ERP the customer already runs.

"Being named an OpenAI Select Partner does not make us a different provider than we were last week; it gives us a formal enablement path and a discipline of method that translates directly into how we document and deliver every project. Our work is to help SME-sized Mexican organizations move from an AI pilot to a system in production: one process at a time, with measurement criteria agreed before we start, and without interrupting the customer's operation during the transition," said Efraín Carreón Ortiz, Chief Executive Officer, Centrum Transgenia SAS.

Centrum Transgenia SAS supports organizations across Mexico, primarily in healthcare services and in distribution and trading companies, spanning operations, administration, and customer service functions, with AI-driven development, ERP-Odoo implementation, cloud development services, custom software

development, web design and development, and technology consulting. Its work includes: **IA service deployments, and IA Training for both Healthcare and Wholesales sectors.**

Looking ahead, Centrum Transgenia SAS plans to expand its OpenAI-related offerings and invest in talent and enablement through the program, as well as helping customers translate AI ambition into business outcomes.

ABOUT CENTRUM TRANSGENIA

Centrum Transgenia SAS is a Mexican technology boutique based in Mexico City. We support SME-sized organizations across six practice lines: AI-driven development, ERP-Odoo implementation, cloud development services, custom software development, web design and development, and technology consulting. We work on processes that already exist, with small teams, and we measure results in live operation rather than in demos. More information at transgenia.org.
